

Quantum Mechanics Survey

Do you feel that your science/math background prepared you enough for this course?

If not, which topics are unfamiliar (besides QM)?

Would you like to see more mathematical calculations?

Would you like to have more discussions as a class?

How is the pace of this course? Too fast? Too slow? Just right?

Have you looked at the wiki? If so, did you find it useful?

What is one thing that you would like to learn from this course?

What can I do to improve the course?
